

AI Agent

↳ LLM powered application that can decide what to do next, use external tools & make step by step towards a goal.

Frameworks from Agentic AI app

→ Without frameworks, implementing Agents would be very difficult.

- Prompt design
 - External tool
 - Decisions
 - LLM configuration
 - Monitoring
- 
- 

⇒ Coding frameworks for Agentic AI.

→ langchain ✓

→ langgraph ✓

→ Crew AI ✓

→ Google ADK ✓

→ AutoGen ✓

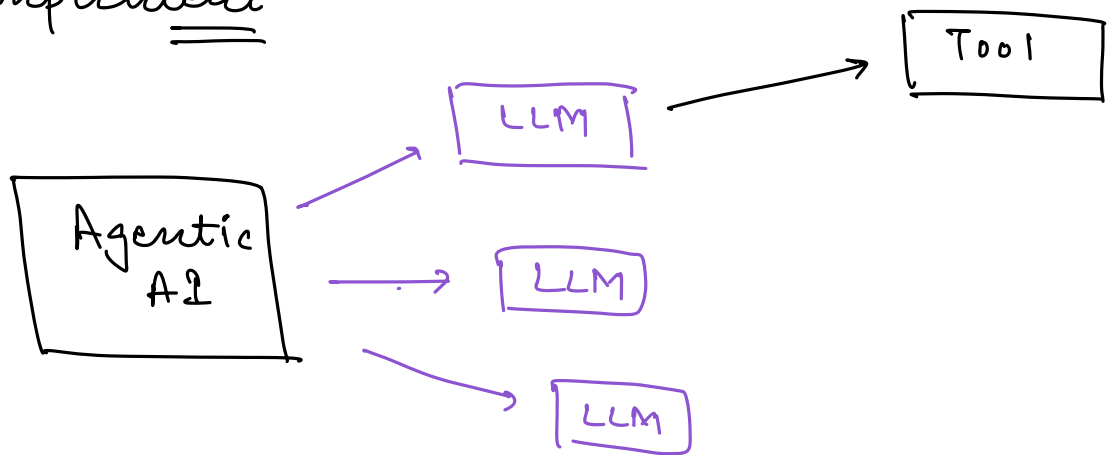

→ Vercel AI ADK ✓

langchain

→ framework for building LLM applications & simple tools.

→ Open Source.

→ fast to implement

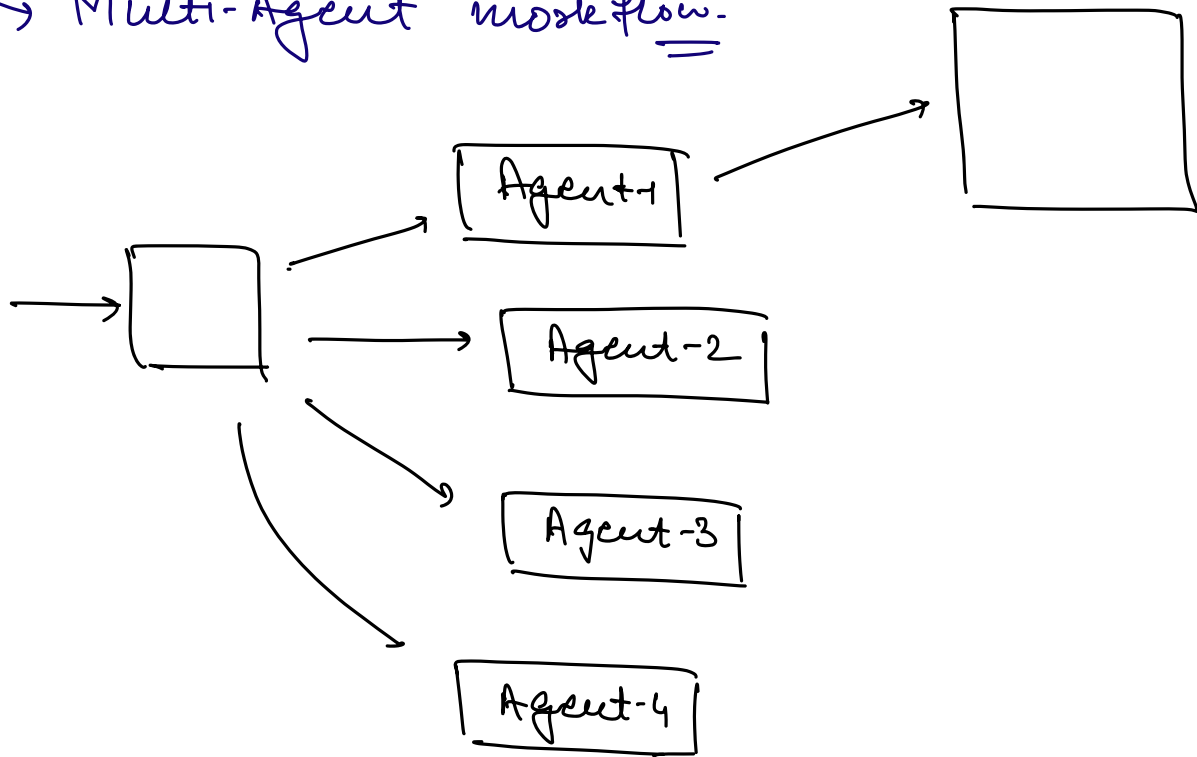

⇒ langchain flw is a good choice for simple workflows.

LangGraph.

→ Complex workflows

→ Multi-Agent workflow.

→ Multi-Step workflow.

→ Take autonomous actions

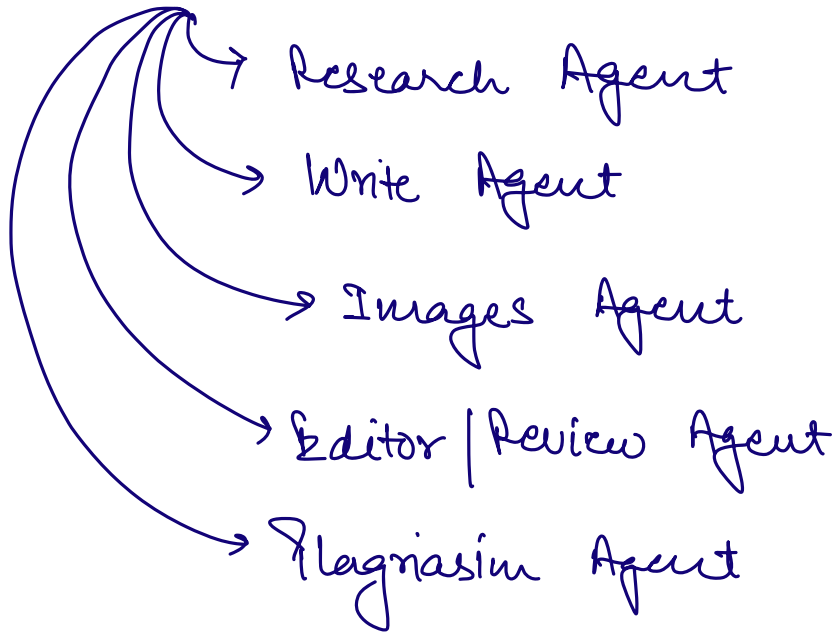

→ run some tasks for long time

→ Schedule.

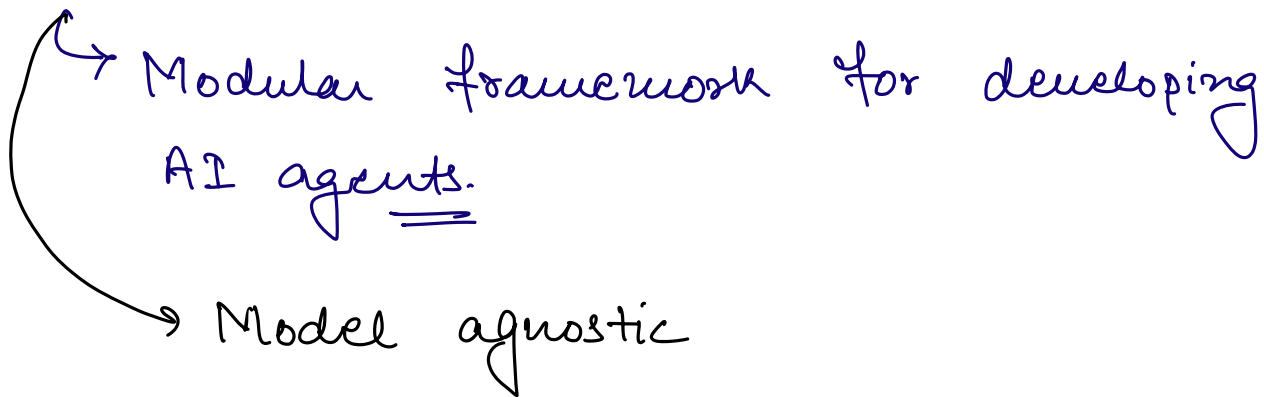

Crew AI

→ Used to build agentic applications around multiple agents working together like a team.

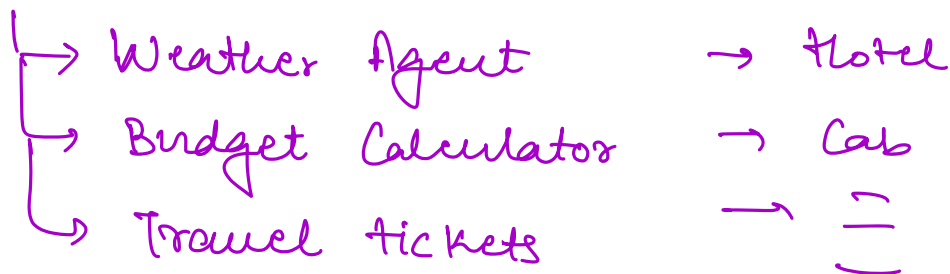

Task : Write a technical blog.

Google ADK

Travel assistant

⇒ Best for companies who are already on Google ecosystem.

⇒ Works best with Gemini.

Vercel AI SDK.

↳ Software Development Kit.

Typescript tool for building AI agent app
↳ Web App

AutoGen

AutoGen is a framework for building multi-agent AI applications where agents can collaborate autonomously or with humans.

→ Best for Microsoft ecosystem.

langchain

langgraph
Google ADK
Microsoft AutoGen
↓
Advanced use-cases

u8u

→ No code | Low Code.

→ Automate workflow

→ Business workflows

→ Approval workflows

→ Visual

→ Strong Human
Feedback in u8u.

Summary

- Simple single agent AI appⁿ : langChain.
- Multi-Agent production grade AI appⁿ with more control over task flow ⇒ langgraph
- Business Automation ⇒ u8u.
- Multi-Agent appⁿ in google ecosystem ⇒ Google ADK
- Microsoft Ecosystem ⇒ Autogen
- Web Appⁿ / TypeScript ⇒ Vercel AI SDK
