

In last class, we built the below flow.

Today:

Retrieval Tool

Tool Arbitration

→ Ability to choose the right tool.

Example for an EdTech support assistant:

User Query	Correct Tool
"What is the refund policy?"	Retriever tool
"What is my ticket status for TKT-1002?"	Ticket status tool
"Can I get a batch change if I missed 3 classes?"	Retriever tool
"What is the status of my refund ticket?"	Possibly both
"Who won IPL 2025?"	No tool / out-of-domain refusal
