

→ Tool → @tool decorator.

→ Tool Calling Agent

↳ create_tool_call_agent function

prompt + LLM + tool

→ Agent Executor.

↳ Runtime Manager in langchain.

↳ Runs the Agent.

Executes tool

Tracks the status.

Limit the number of iterations
errors

→ max_iterations = 3

→ handle_parsing_errors = true

↳ Don't crash immediately.

↳ Send the parsing error back to the agent, so the agent can observe & check.

↳ Give a chance to the Agent to recover.
